Dreams Realised
Choosing to train with Asia Pacific Flight Training (APFT) is the best choice you can make in your flying career.

Aviation is a fast moving and exciting industry to be in and your ambitions will be fulfilled at APFT. We will provide you with the knowledge and skills to soar through the skies. At APFT, we focus on ensuring that you not only have the qualifications but also the skills, character and qualities to achieve your dream. Your future is what you make of it.

“Together we will make your dreams a reality.”
Asia Pacific Flight Training (APFT) was set up to provide training towards obtaining a professional pilot’s licence. The academy is located at Sultan Ismail Petra Airport, Pengkalan Chepa, Kota Bharu, Kelantan.

APFT is approved by the Department of Civil Aviation (DCA) Malaysia. Internationally recognised by the International Civil Aviation Organisation (ICAO), APFT has been selected by Malaysia Airlines and other major airlines as an approved organisation for the flight training of their cadet pilots. The academy has been given the status of a private higher education institution (IPTS) by the Ministry of Higher Education Malaysia. APFT is also accredited with the MS ISO 9001:2008.

At APFT cadets are exposed to an aviation environment where airline domestic flights occur daily. Sultan Ismail Petra Airport is a first-class airfield, equipped with radar, instrument landing system and other approach aids.
VISION
To be recognised as Asia Pacific’s leading provider of pilot training.

MISSION
To achieve the highest standards of integrity, discipline and professionalism in our everyday performance.
Asia Pacific Flight Training (APFT) was set up to provide training towards approach aids at Sultan Ismail Petra Airport, Pengkalan Chepa, Kota Bharu, Kelantan. At APFT cadets are exposed to an aviation environment where airline airport, equipped with radar, instrument landing system and other facilities such as the dining room, well-stocked library with a comprehensive range of reference books, and a pantry. The academy provides spacious accommodation at the ‘Crew Villa’ and has a well-equipped library with a variety of study materials, including comprehensive textbooks and magazines, for the benefit of the cadets. A strong learning and professional flight academy is situated on the island of Penang and also based in Kuala Lumpur. APFT Flight Operations uses state-of-the-art computerised navigation lights involve crossing mountain ranges to ease of flying a modern and advanced interior as well as the accuracy and full all round visibility offered by the dome canopy, the comfortable G1000 glass cockpit. Pilots will enjoy the full all round visibility offered by the dome canopy, the comfortable G1000 glass cockpit. Pilots will enjoy.

The Ground School has spacious classrooms with an examination hall. The facilities are fully air-conditioned and include a lounge and cafeteria. All the rooms are fully equipped with whiteboard, computer and projector.
Library & Learning Resources
APFT has a well-stocked library with a comprehensive range of reference books. There is also a digital library to ensure that all cadet pilots have access to the latest developments in aviation. The academy produces all the required training manuals and support documentation in-house. There is also a comprehensive selection of aviation books, magazines, videos and other training aids available for reference. Computers with Internet access are also available in the library for the convenience of cadets.

Facilities
Cadet pilots can rest and relax in the comfortably furnished lounge. Magazines and other reading materials, are provided. The cafeteria provides a full breakfast, morning snacks, lunch and afternoon tea for cadets attending ground school. Locker facilities are also provided for cadets who wish a secure place for their personal belongings.

Student Support Services
All our administrative staff are friendly and approachable. They will provide all the help required by cadet pilots.

INTRODUCTION

The academy has a Ground School, a Flight School, Flight Operations, Library & Learning Resources, and a Residence. The academy produces all the required training manuals and support documentation in-house. There is also a comprehensive selection of aviation manuals, guidebooks and flight simulations.

The Ground School has spacious classrooms with an examination hall. The classrooms include a whiteboard, computer and projector. The Flight School has several simulators, the ALSIM AL200 MCC and the Diamond DA 42 TwinStar simulator. The DA 42 FTD allows the cadet pilot to become familiar with aircraft systems. The Diamond DA 42 TwinStar simulator is a valuable asset for training instrument flying before commencement. The simulator is a Flight Training Device with full visual simulation, providing maximum fidelity and a seamless transfer from simulator to aircraft training. The Airline Transport Pilot Integrated Course is the most popular course a cadet pilot needs for obtaining that all important and integral part of APFT.

Flight training is conducted smoothly and includes a lounge and cafeteria. The academy to conduct the tests on its training cadet. Test does the psychological evaluation of each cadet. The academy to conduct the tests on its training cadet. Test does the psychological evaluation of each cadet. APFT instructors come from varied backgrounds, both military and commercial, bringing with them many years of experience. Imparting professional flight training is an important and integral part of APFT.

The flight academy is situated on the airside, next to the Sultan Ismail Petra Airport Terminal and it shares the same runway with the commercial airlines. This provides our cadets the opportunity to fly in a fully operational airport environment exposing them to the real airline experience.

APFT instructors come from varied backgrounds, both military and commercial, bringing with them many years of experience. Imparting professional flight training is an important and integral part of APFT.
Flight Planning

APFT has briefing cubicles as well as a flight planning room for use by instructors and cadets. Facilities include Jeppview software to ensure all charts and aeronautical information are current and updated. There are also computers for weather briefings. Maps and charts are easily accessible.

Flight Operations

APFT Flight Operations uses state-of-the-art computerised scheduling system to monitor and ensure efficient flow of some two thousand hours of flying per month. The dedicated staff ensures that flight training is conducted smoothly and with utmost safety.

Flying In Kelantan

Flying in Kelantan is a pleasure as the airport is on the coast near a major city - Kota Bharu. Navigation flights involve crossing mountain ranges to the island of Penang and also south to Kuala Lumpur, all allowing for great scenic flights.
The Simulator Centre operates two simulators, the ALSIM AL200 MCC and the ALSIM AL200 DA42. They are used for instrument flight training as well as for the Multi Crew Cooperation Course (MCC).

Training is conducted by experienced instructors who simulate different flight conditions and introduce the cadets to instrument flying before commencement of flying training on twin engine aircraft.

**ALSIM 200 MCC**

ALSIM 200 MCC is a sophisticated Synthetic Flight Training Device with full visual simulation. It accurately simulates the handling characteristics of multiple aircraft from single engine pistons to multi engine jets. This simulator is a valuable asset for training normal and emergency procedures. It also has the necessary features for the conduct of Multi Crew Cooperation Training.

**DIAMOND DA 42**

The Diamond DA 42 TwinStar simulator is a state-of-the-art flight training device (FTD), fully representative of the DA 42 aircraft. It provides maximum fidelity and a seamless transfer from simulator to aircraft training. The DA 42 FTD allows the cadet pilot to become familiar with aircraft systems.

APFT currently has an integrated fleet of aircraft:

**Piper PA28 Warrior**
These aircraft are equipped with conventional analogue instruments and have a long established reputation as a proven aircraft for ab-initio training. They are an ideal platform for general handling exercises, transition to solo flight and VFR navigation. Full engineering support for these aircraft is provided locally under the approval from DCA.

**Diamond DA40**
The academy provides the Diamond DA40 aircraft fitted with Garmin G1000 glass cockpit. Pilots will enjoy the full all round visibility offered by the dome canopy, the comfortable interior as well as the accuracy and ease of flying a modern and advanced training aircraft.

**Diamond DA 42**
The most technologically advanced twin engine training aircraft in the APFT fleet is fitted with the Garmin G1000 glass cockpit and a composite airframe. It has proven worthy of its position as our flagship aircraft.

**Helicopter R44**
The Raven is renowned to be ideally suited for ab-initio flight training. It is APFT’s most reliable rotary winged hovering machine as well as being the most popular single engine helicopter in the world.
Aircraft Maintenance

APFT’s aircraft are maintained in our own fully equipped hangar by our own maintenance staff. Our engineering teams are certified to carry out the checks and inspections according to the airworthiness rules and regulations.

This facility also complies with part 145 standards.
The academy provides spacious and comfortable resort-style accommodation at the ‘Crew Residence’ where the Main House is surrounded by thirty-six fully furnished villas for our cadets. Each villa is equipped with amenities such as bedrooms, bathrooms, a pantry, a living room and can accommodate six students. The Main House provides common facilities such as the dining room, lounge area with television and wi-fi connection, the laundry room and gymnasium. Cadets can have their meals at the cafeteria where a wide variety of food and beverages are available. There is also an outdoor café for those who prefer to dine al fresco or hang out with friends.

Transportation between the Crew Residence and the Flight Academy is provided by our fleet of air-conditioned buses.

COURSE & EMPLOYMENT

GUIDANCE

CAREER &
APFT Integrated Course

The Airline Transport Pilot Integrated Course is the course a cadet pilot needs for obtaining that all important first professional pilot’s licence. The DCA Malaysia Commercial Pilot’s Licence with Instrument Rating has a high reputation, and cadets with this qualification are the most sought after by airline recruiters.

When you enter this course at APFT, you may start with little or no previous flying experience. The program has been carefully structured to fully cover all the theoretical knowledge and practical flying requirements of the syllabus.

Progress and performance of the cadets are updated continuously to sponsors and parents to encourage cadets to achieve the best results.

Aptitude as a pilot and commitment are qualities considered necessary for the modern Commercial Pilot. In order to keep up to the standards required by major airlines, all applicants will be formally assessed for these qualities before being offered a place in the integrated programme.

Psychomotor/Psychometric Tests

APFT is the first and to date the only Malaysian flying academy to conduct the tests on its training cadet pilots. Psychomotor co-ordination assesses the cadet’s capability to coordinate the movement of arms, hands and feet in response to visual stimuli. The psychometric test does the psychological evaluation of each cadet.

Aviation English

DCA Malaysia requires for all pilots and air traffic controllers to have a minimum of Level 4 Aviation English. APFT conducts special English classes for their cadets and also provides the Aviation English Test at the academy.
APFT cadets are actively encouraged to develop and cultivate professional attitudes and self discipline. From the beginning of the course, cadets will have a sense of discipline and responsibility instilled in them. Commercial and economic values are included in the program to make cadets aware of what is expected of a Professional Pilot.

APFT organises structured lectures by Airline Captains in the aviation industry regularly to expose the cadets to the aviation world. APFT also invites First Officers recently graduated from the academy, to return and provide insight into the work ethos of a professional pilot.

APFT also liaises with airline recruitment agencies to ensure that graduates from the academy are given first pick at the best jobs. APFT staff assists the graduates in writing their CV and preparing for airline interviews. Suitable cadets will then be given a recommendation letter from the academy to enhance their chances of success at selection for an airline.

The Alumni

The Registrar at APFT has an alumni section, whereby graduates can keep in touch with colleagues, friends and the academy. Upon graduation a cadet automatically becomes a member of APFT Alumni Association.

Membership includes:

- ample networking opportunities through specialist events and our online community network.
- career information and guidance.
- regular electronic communications with a copy of “The Aviator” newsletter to bring the latest news on APFT and the aviation industry.
